## 2. Neat Image Adjustments One of the most common Photoshop tools is the Spot Healing Brush. This tool scans the area you are painting and analyzes the pixels. It then suggests a color or strength for that pixel and applies it to the area. This is useful for repairing small defects, such as dust, scratches, or burnt-out pixels. When you select the Brush tool, the software will ask if you want to use a brush instead of a sponge. If you do, the Brush Tool must be enabled before Photoshop will be able to draw and fill with color. ## 3. The Masking & Tracing Menu This menu helps you crop images, clean up and fix objects that are partially hidden, and align layers of different images, whether they are photographs or artwork. To create a mask, you simply click and drag out an area of your image, and the software will clean up the pixels around that area. Masking allows you to set which pixels can be deleted and which pixels can be preserved. You can often find unwanted objects or pixels that have been left unintentionally in the background of your photographs. ## 4. The Airbrush The Airbrush tool allows you to paint with color, and is useful for softening effects or adjusting your image's color. You can use the Airbrush tool to paint around a color or set a specific color. This can be useful for transforming an image into a different color or adjusting the colors of objects in a photograph. To get started, select the Rectangular or Single Airbrush tool from the toolbox menu. ## 5. The Shape Pen The Shape Pen is similar to the Pen tool that you use in Illustrator. It allows you to work with curves, shapes, and basic vector art tools. You can use the Shape Pen to draw, add vector content, cut out shapes, and modify and adjust paths. To make this work, you will need to ensure that the Shape Paths feature is on. You can toggle the setting from the menu to view the shape's edges. ## 6. The Free Transform The Free Transform command allows you to easily change the size, shape, and rotation of your image. It is useful for aligning and positioning objects in your photographs. You can also scale an object to fit within your canvas. In the 2D Palettes, the Free Transform window contains several tools: the Rectangle, Ellip

### What's New in the?

This life was meant for me. Perfect happiness in this moment. My weaknesses have created my strengths. --- I love to explore and learn about things, life and our world. My positive outlook, compassion and my ability to adapt have prepared me to succeed in nearly everything I've been through. Things I am: a young adult, a medical coder, a designer of anything related to product design and a part-time photographer, painter, and artist. I am a newcomer to God's grace and His plan for my life, but I trust God's plan for me completely. Now Look at it this way: I'm going to the best party in town tonight. --- "God made me a good loser." I believe that God created me to be a good loser in life. When we are children, we look at others and wish we were them, and if we can't be, we wish we were like them. As we get older, we begin to understand the world in which we live. We begin to live our lives through challenges, and we come to understand our own lives in light of that. Life is temporary, so we try to make our time meaningful and purposeful. We come to understand that we are here on this Earth to do one thing. We live our lives as winners. Then I had fun last night. I'll have fun tonight. I love myself now. --- When I was younger, I used to think about the perfect life. I thought about all the stuff that I needed to be happy. I thought about other people who were happier than I was. When I got older, I couldn't really care that much about people else's lives. I thought more about the nature of the universe and how we fit into it. Life is what we make it. Life's only requirement is you. You don't have to have a lot of money, you don't have to work a nine-to-five job, and you don't even have to have a house or a car. Maybe you think that you can't live in a cave, or that you need technology and money to make yourself happy. You are wrong. You are beautiful, unique and only you can make you
