If you find any problems please contact us through the below comment form.Dental plaque is a soft deposit which accumulates on the surfaces of teeth. Bacteria in the plaque can cause gingivitis or periodontitis. If left untreated, the infection can progress to gum tissue and bone loss. It is known that fluoride can have a beneficial effect on the formation and development of dental plaque, e.g., in the form of varnishes and gels. U.S. Pat. No. 3,429,090 describes dental compositions comprising a zinc salt, e.g. zinc fluoride or zinc oxyfluoride. U.S. Pat. No. 3,880,751 describes dental compositions comprising a potassium salt, e.g. potassium fluoride or potassium oxyfluoride. U.S. Pat. No. 4,347,206 describes dental compositions comprising a substituted quaternary ammonium salt, e.g. benzyl trimethyl ammonium chlorides. Dental plaque is disclosed in a study by Loesche, R. B., et al., The Lancet, Vol. 4, No. 7737, pages 633-34 (1978). Dental plaque is also disclosed in a study by Dussek, H. G., et al., J. Periodontal., 44, pages 537-444 (1973). The present invention results from efforts to find ways to effectively enhance the anti-plaque properties of dentifrice compositions with certain anti-plaque active ingredients.AUTHORS-- Weaving the (Advent) Season This form of Advent evokes lots of thoughts and feelings, even when one is toying with the possible and unusual. Despite the fact that there is no Christmas season in the Orthodox Calendar, it is common for Orthodox Christians to celebrate the Season of Advent and the Nativity
