strange is that the DRB III Micropod 2 shows it's not working even if it is, I tried to send it with my Android phone(s). The DRB III witech 2 scanner program is a full software app that works with windows. CH Jeep DRB 3 and DRB 3. To use the dt in windows XPÂ .The invention relates to a method for the processing of a compressed data sequence, in which a quantized vector value is associated with a value sequence that is known in advance, and in which the value sequence is compressed in a fixed pattern in which a quantization unit is assigned to each value sequence. Methods for the processing of compressed data sequences are known, for example from the article by Renato Alibart, entitled "Lossy Compression Algorithms for Noisy Source Coding", in the Journal of the IEE (Institute of Electrical and Electronics Engineers), 1991, which is hereby incorporated by reference in its entirety. In this case, the values of vectors that have to be processed, known as source vectors, are quantized. A quantization unit assigns a quantization index to each source vector and thus to the quantized source vector, and all the vectors are quantized in the same pattern. The compression is achieved by selecting the quantization unit that is associated with the greatest compression factor, among all the quantization units. However, this method applies only to a compression of a compressed data sequence, i.e. a compressed data sequence is compressed in exactly one compressed sequence. 298

S.E.2d 453 (1983) STATE of North Carolina v. James IVANSON. No. 8227SC226. Court of Appeals of North Carolina. November 15, 1983. *454 Atty. Gen. Rufus L. Edmisten by Asst. Atty. Gen. John F. Maddrey, Raleigh, for the State. James C. Connell, Raleigh, for defendant-appellant. EAGLES, Judge. We find the defendant's second assignment of error to be dispositive of this appeal. The defendant's second assignment of error is that the trial court erred in denying his motion to dismiss at the close of all the evidence because the State failed to rebut his prima fac
