An all-new system has been developed to enable the game to dynamically evaluate and respond to the different types of challenges a player can face in-game. This new AI (Artificial Intelligence) engine is embedded into the FIFA Player Analysis system and is used to identify and find any weaknesses in a player's game. These weaknesses can come in the form of poor decision making, technique, strength, speed or awareness. Deficiencies are then enhanced and trained using various techniques to improve the player's decision making, technique and decision making. This system of player analysis and training is now even more powerful and powerful than before, with new advances added to the existing techniques. Players will face different challenges – either in open play or in a one-on-one situation. "I can describe FIFA 21 as the most beautiful game. It really does come to life," said FIFA Live team member and game developer

---

Richard Gough. "However, to continue to develop the game, we needed to add more depth to the AI. The HyperMotion system makes this possible." In addition to the large number of new immersive features, FIFA 22 will introduce nine official licenses. This includes three brand new leagues – the Indian Super League (ISL), the Thai Premier League and the United Soccer League (USL). These new leagues will offer new challenges to players and more challenging opposition for the clubs

in the game. There are also a number of brand new gameplay features and enhancements. These new features include the ability to score extra goals and the introduction of goals from penalty kicks. FIFA 21 will be available for PlayStation 4 and Xbox One on 15th August in North America and on 14th August in Europe.

Complete genome sequence of *Saccharomyces cerevisiae* strain KKRY011, a non-aspartyl protease-deficient mutant isolated from a rice-based Japanese traditional fermented food. The complete genome of *Saccharomyces cerevisiae* KKRY011, a protease-deficient mutant of KKRI-110, was sequenced, assembled and annotated.

The genome contains 12.6 Mbp in 14 chromosomes and includes genes for mitochondrial translation, nucleoside and NADP metabolic pathways and carbon, nitrogen and phosphorous metabolism. ## **What's new:**

- **Team of the Year - In the Team of the Year mode, you select a time period that you want to play, such as a World Cup, a World League, or a single league season. The game then polls all of the data from the complete season,**

---

**rankings and fixtures loaded into the Ultimate Team card, to create a team that represents the best winning performances in history. You get to manage the creation of your own team and create a squad of famous names, superstars and secrets from the most impressive duos and partnerships ever to play the beautiful game. You can even sign the marquee player from your club and let him decide his own card.**

- **2016 UEFA Champions League** - The Red Devils have lifted the UEFA Champions League title twice in recent seasons. Now the team is back with the biggest trophy in the European game
- **UEFA Champions League Update** - In August 2015, the UEFA announced the biggest change to the UEFA Champions League format since the competition launched. Now clubs play 38 weeks of matches to compete for the crown. Keep a keen eye on your fixtures each week and make sure you fix matters on time, as you want to perform well when the next round of elite fixtures begin. So set the calendar, secure the competition and embrace the challenges of seeing it all the way through to April.
- **Double Fifties Plus** - You can now find two FIFA Ultimate Team players in a 50/50 pack. There

---

**are more than 30 footballers who have already scored more than 50 international goals, and now you'll find them in packs so you can collect them with your friends.**

- **Power-ups - You'll now have lots of extra ways to attack and defend. Formerly known as Seismic Interception, this new move will see the ball's direction diverted when intercepted**
- **Passes - As always, all the passing moves are enhanced with more authentic, and exaggerated touches and hassles. Although both the FIFA and Pro Clubs are upped as an improvement from previous years.**
- **Ball Physics - The physics engine is bigger, better and clearer, bringing an all-new level of realism to the largest and most detailed pitch ever.**
